Remote, UTC+4 (13:00–21:00 UTC = 09:00–17:00 US Eastern, 15:00–23:00 CET/CEST) | Open to full-time, part-time, freelance and contract work

SUMMARY

Senior front-end engineer with 5 years of React and TypeScript. I build real-time interfaces for a gaming platform with 100,000+ daily users: WebSocket performance, shared design-system components, and code reviews. I also designed our Claude Code workflow, where I plan and review and the agent drafts.

WORK EXPERIENCE

Senior Software Engineer — SoftConstruct | 09/2022 – Present

React, TypeScript, Redux Toolkit, WebSocket, SCSS

- Build front-end features for online games and the shared lobby, on a platform with 100,000+ daily users, in a 10-person React team inside a 30-person engineering team.
- Fixed performance problems and memory leaks in the lobby's live table data (real-time statistics over WebSocket subscriptions).
- Built reusable design-system components (buttons, typography, localized text) and a custom slider used across several product features.
- Built shared autoplay logic reused in 7–8 game modules, removing duplicated business logic.
- Review code and mentor mid-level developers on features and complex debugging.
- Designed a Claude Code agent workflow (Jira task creation, GitLab integration, review support, edge-case analysis before coding). A new game's delivery went from about 4 weeks to about 1 week, once the workflow was set up.

Front-End Developer — Esterox LLC | 04/2021 – 09/2022

- Started as an intern and moved to a full-time role on production projects.
- iPlanner (Sweden): built the front-end with React and Next.js, for a platform where customers design a house and negotiate changes with a construction company.
- Learning platform (USA): built student-side features (video lessons, progress tracking) with React and Recoil, and fixed production bugs.
- Hotel advertising analytics panel (USA): built charts, reports and an admin panel with Vue, Vuex and Google Charts, full-stack for about 5 months, using Firebase (Firestore, Storage).
- Worked directly with clients in Sweden and the US across time zones. Mentored a junior developer.

SKILLS

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, Vue.js (Vuex), Redux Toolkit, Recoil, SCSS, Bootstrap

Backend / data: Node.js, NestJS, MongoDB, Firebase (Firestore, Storage), REST, GraphQL

AI-assisted development: Claude Code — agent workflow design, Jira and GitLab automation

Testing (learning): Vitest, React Testing Library, Playwright, MSW

Practice: component architecture, performance profiling, memory leak fixing, real-time (WebSocket) features, code review

Tools: Chrome DevTools, React Profiler, Lighthouse, Git, Agile/Scrum

EDUCATION

BSc Information and Applied Mathematics, Yerevan State University, 2016–2023

LANGUAGES

Armenian (native), Russian (professional working proficiency), English (upper-intermediate, B2)
