PROFILE

Senior front-end engineer with 5 years of React and TypeScript, building real-time interfaces for a gaming platform with 100,000+ daily users. My work covers WebSocket performance, shared design-system components, code review and mentoring. I designed our Claude Code workflow: I plan and review; the agent drafts.

EXPERIENCE

Senior Software Engineer

09/2022 – Present

SoftConstruct

Stack: React, TypeScript, Redux Toolkit, WebSocket, SCSS

- Build front-end features for online games and the shared lobby of a platform with 100,000+ daily users (10-person React team in a 30-person engineering team).
- Review code and mentor mid-level developers on features and complex debugging.
- Fixed performance problems and memory leaks in the lobby's live table data (real-time statistics over WebSocket subscriptions).
- Designed a Claude Code agent workflow: Jira task creation, GitLab integration, review support and edge-case analysis before coding. Once it was set up, delivery of one new game went from about 4 weeks to about 1 week.
- Created shared autoplay logic reused in 7–8 game modules, removing duplicated business logic.
- Built reusable design-system components (buttons, typography, localized text) and a custom slider, used across several product features.

Front-End Developer

04/2021 – 09/2022

Esterox LLC

- Started as an intern and moved to a full-time role on production projects.
- Worked directly with clients in Sweden and the US across time zones. Mentored a junior developer.
- **House-planning platform (Sweden):** built the React and Next.js front-end for customers who design a house and negotiate changes with a construction company.
- **Learning platform (USA):** built student-side features (video lessons, progress tracking) with React and Recoil, and fixed production bugs.
- **Hotel advertising analytics dashboard (USA):** built charts, reports and an admin panel with Vue, Vuex and Google Charts. Worked full-stack for about 5 months with Firebase (Firestore, Storage).

AVAILABILITY

Remote, UTC+4

13:00–21:00 UTC = 09:00–17:00 US Eastern, 15:00–23:00 CET/CEST

Open to full-time, part-time, freelance and contract work

SKILLS

Frontend

JavaScript (ES6+), TypeScript, React, Next.js, Vue.js (Vuex), Redux Toolkit, Recoil, SCSS, Bootstrap

Strengths

Component architecture, performance profiling, memory leak debugging, real-time (WebSocket) features, code review

Backend / data

Node.js, NestJS, MongoDB, Firebase (Firestore, Storage), REST, GraphQL

Testing

Vitest, React Testing Library, Playwright, MSW

AI-assisted development

Claude Code, Jira automation, GitLab automation

Tools & process

Chrome DevTools, React Profiler, Lighthouse, Git, Agile/Scrum

EDUCATION

BSc Information and Applied Mathematics

Yerevan State University
2016–2023

LANGUAGES

Armenian

native

Russian

professional working proficiency

English

upper-intermediate, B2
